

Dear Sir/Madam,

I would like to take this opportunity to introduce myself, I have recently left the employment of Jade Engineering as General Manager. As you can see from my resume I have been involved in mechanical engineering and oil and gas industries most of my working life.

Starting as a fitter/ turner, then plant operations. Since being in Australia I have managed fabrication and machine shops and held sales and project management roles in the supply of equipment to the CSG Industry.

If you have any roles currently available within your company that you feel would fit my skillset I would be grateful for an opportunity to discuss them further with you.

Many thanks,
Brendan Brankin
